Project Profile: Capital Square Fountain Courtyard, Chelmsford

Project Details

Client: Landscape Contractor: Contractor for fountains: Landscape Architects:

Barratt Eastern Counties
Oak View Landscapes Limited
Miles Waterscapes Limited
Liz Lake Associates

The project

Capital Square is a mixed-use development of luxury apartments and retail units built around two landscaped courtyards situated near the centre of Chelmsford. The western 'fountain courtyard' provides a contemporary landscape space with seating to view the feature fountains.

The primary landscape objective for the site was to create a high quality, safe, fountain courtyard, with a sense of unity with and complementary to the surrounding architecture. Oak View Landscapes Limited were contracted by Barratt Eastern to install specialist tree pits with lighting, conservation kerbs, spherical bollards, setts, pavers, arboresin and benches to create the area surrounding the fountains. Miles Waterscapes Limited installed the central fountain feature within the stainless steel edging.

Unusual features and challenges overcome during the course of the work:

The restricted access to the site and the overall lack of available storage space together with a very tight construction programme, short lead in time and temperatures of over 30°C made this an incredibly challenging project. However, Oak View Landscapes met their handover dates on time and within budget.

After precise setting out it was discovered that all the silver grey 100mm x 100mm blocks were nominally larger than the manufacturer's specification, which meant that subtle readjustments to the laying of these setts had to be made in order to avoid the unnecessary cutting of the paving blocks. A close and positive team-working relationship between the

landscape architect and the landscape contractor enabled these issues to be overcome. During the works, Oak View suggested turning the alignment of the block that butted up to the curvy stainless steel edge through 90°. In this way a better relationship between the two could be achieved with precise neatly cut blocks. This was implemented to good effect.

The outcome

or email:

The project won a BALI National Award in the 'Mainly Hard Landscaping Cost Over £50,000' category. The awards adjudicators described Capital Square as a "stunning urban courtyard" and acknowledged Oak View's "high level of skill and professionalism" in stating "their work on the Capital Square project in Chelmsford demonstrated that they place great importance on quality workmanship and professional project management."
